**-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --****Period for Reply**

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

### **Rejections based on Prior Art**

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 22 and 23 are rejected under 35 U.S.C. 103(a) as being unpatentable over Jackson et al (US 5,716,355) in view of Cotrel (US 5,601,552), Drewry et al (US 5,947,966), and Jackson (US 5,980,523).

In Figure 12 note the Jackson et al '355 connector having a shaft 118, the first end having a hook 129 with curved inner surface 126 for receiving a longitudinal member 112 the shaft second end has ridges to provide for a rigid non rotational lock with fastener assembly 119. The Jackson et al '355 hook 129 uses a second hook piece (or cap) 123 and associated set screw 124 for fitting with the hook 129 to lock the hook in position with rod 112 rather than having the one-piece hook with set screw as is required by the present claims. The construction of such rod engaging hooks with a single set screw for locking the hook with the rod is old and well known in the orthopedic art as is taught for example by Cotrel (hook 5, set screw 14), Drewry et al (hook 218, set screw 225) and Jackson '523 (hook 34, set screw 22). To have merely substituted the two piece hook structure of Jackson et al '355 with the conventional one-piece hook structure of the prior art as is evidenced by Cotrel, Drewry et al and Jackson '523 in

Art Unit: 3732

order to simplify the construction and use would have been obvious to one of ordinary skill in the art.

### Action Made Final

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the date of this final action.
